Alejandro Zielinsky

Senior Software Engineer | iOS & Product Engineering

Vancouver, BC, Canada | +1 (416) 830-0314 | azielinsky95@gmail.com
aziolabs.com | LinkedIn: alejandrozielinsky | GitHub: AZielinsky95

8+ years building native iOS apps, with end-to-end ownership across product design, backend systems, and AI. Creator of Bento and three other independent products.

EXPERIENCE

Senior Software Engineer | AZIO Labs Inc. Aug 2025 - Present

Meshmap - Senior iOS Engineer (Contract) Aug 2025 - Present

- Sole iOS engineer for GLO; refactored the codebase and built AR scavenger hunts with backend-persisted ARWorldMap data.
- Optimized real-time AR graffiti rendering by combining meshes for continuous painting and texture placement.

GainIQ - Senior AI Engineer (Contract) Nov 2025 - Nov 2026

- Partnered with the PM on PRDs, wireframes, and product design; built Spirea's React/Tailwind CSS frontend and Node.js backend on AWS.
- Connected creative clustering using embeddings and perceptual hashing, plus AI tagging, to an agentic canvas for generating ads.

Senior iOS Engineer | Teleport Rideshare Aug 2024 - Feb 2025

- Sole iOS engineer during the transition to rideshare aggregation; rearchitected the app to support the product pivot.
- Built trip search, rider and driver flows, and interactive maps with SwiftUI and MapKit.

Senior Software Engineer | Steamclock Software Aug 2021 - Aug 2024

- Led development across **7+ client iOS apps**, including Ridwell and Ora Organic; mentored junior engineers through pairing and code reviews.
- Built GuideAlong's touring and mapping features and delivered a full app rebrand.
- Developed StoreKit pricing algorithms for in-app purchase discounts and tour bundle pricing.

iOS Engineer | Connected Mar 2020 - Aug 2021

- Modernized RBC Mobile's OAuth framework from Objective-C to Swift; contributed to SwiftUI fintech apps through pairing and test-driven development.

iOS Engineer | Optimity Sep 2018 - Mar 2020

- Migrated **80%** of the legacy Objective-C codebase to Swift/MVVM; built UI, animations, and health features with UIKit, Core Motion, Core Animation, and HealthKit.
- Automated build and release workflows with Fastlane and Jenkins, reducing deployment time by **50%**.

INDEPENDENT PRODUCTS

Bento - iOS Finance App & AI Assistant

- Designed and shipped Bento as sole developer across SwiftUI, Node.js, and Benii AI; optimized planning and tool calling to reduce inference costs.
- Built composable dashboards, Plaid/Supabase integrations, PDF statement imports, and voice-based transaction entry.

Sticker Llama: AI sticker app spanning generation, collections, and print ordering.
Letterbox: Original daily word games, designed and shipped in SwiftUI.
Poly Vita: Solo-developed Unity puzzle game released on iOS, Android, and Steam.

TECHNICAL SKILLS

Languages: Swift, Objective-C, TypeScript, JavaScript, SQL, C#
iOS: SwiftUI, UIKit, ARKit, MapKit, StoreKit, Combine, HealthKit, MVVM
Full Stack & AI: React, Tailwind CSS, Node.js, AWS, Supabase, LLM tool calling, embeddings, CI/CD

EDUCATION

Lighthouse Labs - iOS Development Certificate 2018
Humber College - Advanced Diploma, Game Programming 2013 - 2016
