Experience

Senior Software Engineer — **AZIO Labs Inc.** — **Aug 2025 – Present**

Meshmap — Senior iOS Engineer (Contract) *Aug 2025 – Present*

- Refactored GLO's codebase as sole iOS engineer; built AR scavenger hunts with ARWorldMaps stored on the backend.
- Optimized real-time AR graffiti rendering by combining meshes to handle continuous paint and texture placement.

GainIQ — Senior AI Engineer (Contract) *Nov 2025 – Nov 2026*

- Built Spirea's React/Tailwind CSS frontend and Node.js backend on AWS, including AI image generation for ad creation.
- Developed visual creative clustering using embeddings and perceptual hashing; built and optimized AI tagging to reduce processing costs.

Senior iOS Engineer — **Teleport Rideshare** — **Aug 2024 – Feb 2025**

- Built trip search, rider and driver flows, and interactive maps using SwiftUI and MapKit.
- Rearchitected Teleport's iOS app to support rideshare aggregation, serving as the sole iOS engineer during the transition.

Senior Software Engineer — **Steamclock Software** — **Aug 2021 – Aug 2024**

- Built GuideAlong's touring and mapping features and implemented a full app rebrand.
- Developed StoreKit pricing algorithms to calculate in-app purchase discounts and resolve tour bundle prices.
- Led development across **7+ client iOS apps**, including Ridwell and Ora Organic; mentored junior engineers through pairing and code reviews.

iOS Engineer — **Connected** — **Mar 2020 – Aug 2021**

- Modernized RBC Mobile's OAuth framework from Objective-C to Swift; contributed to SwiftUI fintech apps using pair programming and test-driven development.

iOS Engineer — **Optimity** — **Sep 2018 – Mar 2020**

- Migrated **80% of Optimity's legacy Objective-C codebase** to Swift/MVVM; built UI, animation, and health features using UIKit, CoreMotion, CoreAnimation, and HealthKit.
- Automated build and release workflows with Fastlane and Jenkins, reducing deployment time by **50%**.

Independent Products

Bento — iOS Finance App & AI Assistant

- Designed and shipped Bento as sole developer, owning the SwiftUI app, Node.js backend, and Benii AI agent.
- Built a composable dashboard system with Plaid/Supabase integrations, PDF statement imports, and voice transaction entry.
- Optimized Benii's planning and tool-calling pipeline to reduce inference costs for natural-language financial queries.

Sticker Llama: Designed and developed an AI sticker app with generation, collection, and print ordering workflows.

Letterbox Daily Word Games: Designed and shipped a suite of original daily word games in SwiftUI.

Poly Vita: Solo-developed a Unity puzzle game released on iOS, Android, and Steam.

Technical Skills

- **Languages:** Swift, Objective-C, TypeScript, JavaScript, SQL, C#
- **iOS:** SwiftUI, UIKit, ARKit, MapKit, StoreKit, Combine, HealthKit, MVVM
- **Full Stack & AI:** React, Tailwind CSS, Node.js, AWS, Supabase, LLM tool calling, embeddings, CI/CD

Education

Lighthouse Labs — iOS Development Certificate — 2018

Humber College — Advanced Diploma, Game Programming — 2013 – 2016
